

**Cost \$1000 + GST**

This is an annual fee to enrol an unlimited number of students from your school into all four topics.

**How to Sign Up:**

Email your school name, address and your contact details to:  
contact @agricademy.co.nz

Agricademy will forward an invoice to you and, on payment in full, a school administrator will be given access to the Agricademy site, along with a how-to video to register each student onto the site.

Once registered, a student will receive an automated email inviting them to sign up to the online content. Your administrator can also monitor a student's progress at any time.

Access to online training is available for a school year.

# Introducing an Online Learning Opportunity in Wool and Dairy for Schools

**Established in 2020, Agricademy is an innovative training company that recognises the need to provide learning content to schools for the generation who study and learn online.**

Through its Get Milking and WOMOLife brands in dairy and wool, introductory online videos are available in a range of subjects:

- Relief Milker
- Crutching
- Wool Handling
- Shearing Gear & Grinding

All online content has been widely researched as fit for purpose as demonstrated by industry experts, and created with best practice animal safety and wellbeing in mind.

Each video is informative and ideal for providing a student with the opportunity to learn the skills and gain the knowledge required for an entry level role in the dairy or wool harvesting industries.

A school can register an unlimited number of students into all of the online courses listed above, for the annual price of \$1000+gst. A student can focus on one industry, or learn from both.

Once enrolled, a student can watch the bite-sized videos, complete the supporting quizzes, and download the pdfs for reference.

If a student opts to complete all the online training, they would be well placed to pursue a holiday or weekend job in the sheds or on-farm, or they could become better educated about the possibilities and opportunities available if they choose to pursue a career in agriculture.

To access the online training, a student would need a device for watching, good connectivity, and an individual email address.

At the end of each subject, a Certificate of Completion is available.

## Practical Training

While this offer to schools is specific to Agracademy's online training only, practical on-farm and in-shed training is available through our on-the-ground trainer network in some areas of the country. Online training must be completed to ensure a student has a good grounding in the subject before they can be considered for any practical training.

Talk to one of our representatives to find out more.

For Wool Industry practical training contact [carmen@womolife.co.nz](mailto:carmen@womolife.co.nz)

For Dairy Industry practical training contact [shelley@agricademy.co.nz](mailto:shelley@agricademy.co.nz)

*Note: Additional costs apply. Minimum age requirement for practical training is 16+ with consent from a parent/guardian. Further online training may be required before a student can book onto a practical course.*

## What would a student learn?

### Relief Milking Course

Students will learn:

- about cow behaviour and how to keep the cows happy
- the basic terminology used in the milking shed
- how to load the Rotary Shed and row up the Herringbone Shed
- the right way to cup a cow
- how to tell when a cow is milked out
- how to remove the cups and check the udders
- teat spraying and how to use the backing gate
- how to clean the cow shed and yard.

### Crutching

Students will learn to

- crutch, removing the wool from around the eye, the tail and between the rear legs.
- pen the sheep
- press the wool

### Wool Handling

Students will learn to

- handle wool and remove the oddments from shorn wool
- check and skirt the fleece
- separate the wool for length, colour and contamination
- set up board duties
- pick up and throw the fleece
- skirt the fleece and wool rolling.

### Shearing Gear and Grinding

Students will learn

- all about handpiece and gear safety
- about the types of combs and cutters, how to set them up, use, clean and maintain them
- how to set up the Grinder, know the parts and how to use it.

All online content has been created to show the value of teamwork and the importance of listening and communication.
